Profile

Senior Backend Developer with 6+ years of experience designing and delivering scalable, secure, and high-performance web applications using Laravel, PHP, and Node.js. Strong expertise in RESTful API development, microservices architecture, database optimization, cloud deployments (AWS, DigitalOcean, GCP). Proven ability to lead backend systems for high-traffic platforms (1M+ users), optimize performance, and collaborate effectively in Agile/Scrum environments.

WORK EXPERIENCE

08/2023 – Present
Lahore

Senior PHP Web Developer

Get Group

- **Led backend development of high-performance web applications** using **Laravel (v8–12), PHP, and CodeIgniter**, ensuring **scalable and maintainable architecture**.
- Designed and developed **secure RESTful APIs** within a **microservices architecture**, enhancing **system modularity and scalability**.
- Architected **multi-cloud file storage solutions** integrating **AWS, Wasabi, DigitalOcean, and GCP**, ensuring **high availability and efficient asset management**.
- Implemented **real-time features using Node.js**, improving **system responsiveness** across distributed environments.
- Managed **VPS and cloud deployments**, including **Linux server configuration, Nginx setup, SSL provisioning, and production optimization via SSH**.
- Optimized **database performance** through **query tuning, indexing, and backend refactoring**, improving **response times under high traffic**.
- Collaborated within **Agile/Scrum environments**, delivering **production-ready features on schedule**.
- Strengthened **application security, monitoring, and system reliability** through performance optimization and best practices.
- Mentored junior developers, conducted **code reviews**, and promoted **clean architecture and coding standards**.

01/2022 – 08/2023
Rahim Yar Khan

Laravel Developer

Virtuenetz

- **Designed and optimized MySQL database schemas**, improving **query performance, data integrity, and overall system efficiency**.
- Developed **responsive and interactive UI components** using **JavaScript (jQuery, AJAX)**, enhancing **user experience and application responsiveness**.

- Conducted **cross-browser testing and usability validation** to ensure **consistent functionality and performance** across major browsers and devices.

08/2018 – 12/2021
Rahim Yar Khan

Laravel Developer

Dexdevs

Achievements/Tasks

- Contributed to **web application development** using **PHP and MySQL**, delivering reliable and maintainable backend solutions.
- Developed **RESTful APIs and server-side logic**, managing **database operations** to support core application functionality.
- Built dynamic web applications using **Laravel and CodeIgniter**, improving **system performance and feature scalability**.
- Performed **debugging, troubleshooting, and performance testing** to enhance **application stability and reliability**.
- Optimized **full-stack application performance** through code refactoring and backend improvements.

EDUCATION

02/2016 – 02/2020

BSCS

The islamia University Bahawalpur

SKILLS & EXPERTISE

Backend Development ● ● ● ● ●

- PHP (Laravel v8–12)
- CodeIgniter
- Node.js
- Express.js
- RESTful APIs
- Microservices Architecture

Payments & Integrations

- Stripe
- PayPal
- Flutterwave
- Paystack
- Third-Party API Integration

Frontend Collaboration ● ● ● ● ●

- React.js
- Next.js
- JavaScript (ES6)
- HTML
- CSS
- Tailwind CSS
- Bootstrap

Security & Performance ● ● ● ● ●

- Security Best Practices
- Performance Optimization

VPS Deployment & Server Management ● ● ● ● ●

- VPS Deployment & Configuration (AWS, DigitalOcean, GCP)
- Linux Server Management via **SSH / Command Line (CMD)**
- Web Server Setup (**Nginx**, SSL, Domain & DNS Configuration)
- Application Deployment (**Laravel, Node.js, React, Next.js**)
- Process Management (**PM2**, queues, schedulers)
- Server Security Hardening & Performance Optimization
- Monitoring, Log Management & Maintenance

Databases & ORM ● ● ● ● ●

- MySQL
- MongoDB
- Eloquent ORM
- Query Optimization
- postgresql

Version Control & CI/CD ● ● ● ● ●

- Git (GitHub, GitLab)
- CI/CD Pipelines

Cloud & DevOps ● ● ● ● ●

- AWS
- DigitalOcean
- Google Cloud Platform (GCP)
- Wasabi
- Linux Environment

Other Professional Skills ● ● ● ● ●

- Problem-Solving
- Team Collaboration

KEY ACHIEVEMENTS

Official Raabta app for PTI [🔗](#)

- Architected and deployed a **high-performance backend system serving 1M+ users**, ensuring **scalability and high availability under peak traffic**.
- Implemented **clean architecture principles** and optimized **database queries and indexing**, improving **system reliability and response times**.
- Developed **secure RESTful APIs** and managed **production-grade deployments** for a **national-level platform**.

- Strengthened **application stability and performance optimization**, enabling smooth handling of **high-traffic workloads**.

Linkon

- Developed **scalable backend APIs using CodeIgniter 4** for web and mobile applications, ensuring **efficient and reliable system performance**.
- Implemented **server management, secure authentication mechanisms, and admin panel functionalities**, strengthening overall **application control and security**.
- Enhanced **API security, performance optimization, and maintainable code architecture**, supporting long-term system scalability.

Ingage

Role: Full-Stack / Backend Lead

- Built the **Ingage.gg**  gaming tournament platform, including web app, backend services, and admin panel.
- Developed REST APIs, managed server infrastructure, and handled cloud deployments.
- Ensured real-time data handling and optimized backend performance for competitive gaming workflows.

Hiphop

- Designed, developed, and maintained a **short-video social platform similar to TikTok**, building scalable backend APIs, managing servers, and developing a full-featured admin panel.
- Implemented and supported **livestreaming functionality**, handled server provisioning and installations, and ensured ongoing application stability, performance, and maintenance.

Club92

Created and manage Club92, a live audio space platform like Clubhouse, handling backend APIs, server management, and installation.

Shaadiabroad

Role: Full Stack / Backend Developer

- Managed backend systems for **ShaadiAbroad.com** , focusing on **security, scalability, and performance**.
- Integrated event management features and enforced **data privacy and compliance standards**.
- Maintained optimized database operations and stable production deployments.

Gtcree

Role: Backend Developer

- Developed a modern **e-commerce platform** for LED lighting products.
- Built backend APIs, admin panel, and optimized shopping workflows.
- Ensured secure transactions, efficient product management, and smooth user experience.

Bracktix

Role: Senior Laravel Developer

- Architected and optimized backend services using **Laravel, MySQL, Redis queues, and caching**.
- Implemented secure authentication using **Laravel Sanctum**.
- Ensured system scalability, performance optimization, and secure cloud deployments.

Almaha

Role: Full-Stack Developer

- Developed a digital healthcare platform using **React.js, Node.js, Express, and PostgreSQL**, enabling seamless doctor-patient interactions with real-time consultations, appointment scheduling, and secure data management.
- Focused on building scalable backend APIs and ensuring data security and HIPAA compliance for patient privacy.
