Profile

Senior Backend Developer with **6+ years of experience** building **scalable, secure, and high-performance web applications** using **Laravel, PHP, Node.js, and MySQL**. Proven expertise in **RESTful API development, microservices architecture, database optimization, and cloud deployments (AWS, DigitalOcean, GCP)**.

Experienced in designing backend systems for **high-traffic platforms serving 1M+ users**, improving performance through **query optimization, caching strategies, and scalable architecture**. Strong background in **Linux server management, CI/CD pipelines, cloud infrastructure, and Agile development environments**.

Passionate about building **reliable backend systems, secure APIs, and distributed architectures** that support modern web and mobile applications.

WORK EXPERIENCE

08/2023 – Present
Lahore

Senior PHP Web Developer
Get Group

- Lead backend development of **scalable web applications** using **Laravel, PHP, and CodeIgniter**, ensuring maintainable and modular architecture.
- Designed and implemented **secure RESTful APIs** within a **microservices architecture**, improving system scalability and service separation.
- Architected **multi-cloud storage solutions** integrating **AWS, DigitalOcean, GCP, and Wasabi**, ensuring high availability and efficient file management.
- Implemented **real-time backend features using Node.js**, improving system responsiveness and event-driven processing.
- Managed **production cloud infrastructure**, including **Linux server configuration, Nginx setup, SSL implementation, and deployment automation**.
- Improved application performance by **optimizing database queries, indexing strategies, and backend logic**, reducing response time under heavy traffic.
- Conducted **code reviews and mentoring for junior developers**, promoting clean architecture and coding best practices.
- Collaborated in **Agile/Scrum teams**, delivering production-ready features on schedule.

01/2022 – 08/2023
Rahim Yar Khan

Laravel Developer
Virtuenetz

- Designed and optimized **MySQL database schemas** for high-performance applications.
- Developed **backend APIs and server-side logic** supporting web and mobile platforms.
- Built **interactive UI features using JavaScript, AJAX, and jQuery**, improving application responsiveness.

- Conducted **cross-browser testing and performance validation** to ensure a consistent user experience.
- Improved **database performance and system reliability** through query optimization and code refactoring.

08/2018 – 12/2021
Rahim Yar Khan

Laravel Developer
Dexdevs

- Developed backend functionality using **PHP, Laravel, and MySQL** for multiple web applications.
- Built **RESTful APIs and backend services** supporting scalable application features.
- Implemented **dynamic application features using Laravel and CodeIgniter frameworks**.
- Performed **debugging, troubleshooting, and performance optimization** to improve application stability.
- Assisted in **database design, system testing, and production deployments**.

EDUCATION

02/2016 – 02/2020

BSCS
The islamia University Bahawalpur

SKILLS & EXPERTISE

Backend Development ● ● ● ● ●

- PHP (Laravel v8–12)
- CodeIgniter
- Node.js
- Express.js
- RESTful API Development
- Microservices Architecture
- MVC Architecture
- API Security (JWT, OAuth)
- Authentication & Authorization

Payments & Integrations

- Stripe
- PayPal
- Flutterwave
- Pystack
- Third-Party API Integration

Frontend Collaboration ● ● ● ● ●

- JavaScript (ES6+)
- React.js
- Next.js
- AJAX / jQuery
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap

Security & Performance ● ● ● ● ●

- Security Best Practices
- Performance Optimization

VPS Deployment & Server Management ● ● ● ● ●

- VPS Deployment & Configuration (AWS, DigitalOcean, GCP)
- Linux Server Management via **SSH / Command Line (CMD)**
- Web Server Setup (**Nginx**, SSL, Domain & DNS Configuration)
- Application Deployment (**Laravel**, **Node.js**, **React**, **Next.js**)
- Process Management (**PM2**, queues, schedulers)
- Server Security Hardening & Performance Optimization
- Monitoring, Log Management & Maintenance

Databases ● ● ● ● ●

- MySQL
- PostgreSQL
- MongoDB
- Eloquent ORM
- Database Design
- Query Optimization
- Indexing & Performance Tuning

Version Control & CI/CD ● ● ● ● ●

- Git (GitHub, GitLab)
- CI/CD Pipelines

Cloud & DevOps ● ● ● ● ●

- AWS
- DigitalOcean
- Google Cloud Platform (GCP)
- Wasabi Cloud Storage
- CI/CD Pipelines
- Git (GitHub, GitLab)
- Linux Server Administration
- Nginx Configuration
- SSL & DNS Management
- VPS Deployment
- Process Management (PM2, Queues, Cron Jobs)

Other Professional Skills ● ● ● ● ●

- Problem-Solving
- Team Collaboration

Performance & Security ● ● ● ● ●

- Application Performance Optimization
- Secure API Design
- Server Security Hardening
- Log Monitoring
- Debugging & Troubleshooting

KEY ACHIEVEMENTS

Hive Comms [↗](#)

Social Media Publishing & Communication Management Platform

- Developed scalable **RESTful APIs using Node.js and Express.js** to support social media post creation, publishing, and scheduling.
- Designed and managed **PostgreSQL database schemas** for posts, scheduled jobs, and user interactions.
- Implemented **post scheduling functionality** enabling users to automatically publish content at scheduled times.
- Built backend services to **retrieve and display comments** from social media posts within the application.
- Optimized backend performance with efficient database queries and structured API architecture.
- Collaborated with frontend developers to integrate APIs and ensure smooth communication between client and server.

Raabta Mobile App (PTI) [↗](#)

Backend Architect

- Designed and deployed a **scalable backend system supporting over 1M users**.
- Implemented **optimized database indexing and clean architecture**, improving performance and reliability.
- Built **secure RESTful APIs** powering mobile and web platforms.
- Managed **production infrastructure and high-traffic system deployments**.

Linkon Platform [↗](#)

Backend Developer

- Developed **scalable backend APIs using CodeIgniter 4** for web and mobile applications.
- Implemented **secure authentication systems and admin panel functionality**.
- Optimized **API performance and system architecture for long-term scalability**.

Role: Backend Developer

- Developed a modern **e-commerce platform** for LED lighting products.
- Built backend APIs, admin panel, and optimized shopping workflows.
- Ensured secure transactions, efficient product management, and smooth user experience.

Almaha

Role: Full-Stack Developer

- Developed a digital healthcare platform using **React.js, Node.js, Express**, and **PostgreSQL**, enabling seamless doctor-patient interactions with real-time consultations, appointment scheduling, and secure data management.
- Focused on building scalable backend APIs and ensuring data security and HIPAA compliance for patient privacy.

Ingage.gg [↗](#)

(Gaming Tournament Platform)

- Built backend services and APIs powering a **competitive gaming tournament platform**.
- Managed **server infrastructure and cloud deployments**.
- Optimized backend workflows for **real-time gaming data and tournament management**.

Club92

Created and manage Club92, a live audio space platform like Clubhouse, handling backend APIs, server management, and installation.

Shaadiabroad [↗](#)

Role: Full Stack / Backend Developer

- Managed backend systems for **ShaadiAbroad.com** [↗](#), focusing on **security, scalability, and performance**.
- Integrated event management features and enforced **data privacy and compliance standards**.
- Maintained optimized database operations and stable production deployments.

Bracktix [↗](#)

Role: Senior Laravel Developer

- Architected and optimized backend services using **Laravel, MySQL, Redis queues, and caching**.
- Implemented secure authentication using **Laravel Sanctum**.
- Ensured system scalability, performance optimization, and secure cloud deployments.

Hiphop

- Designed, developed, and maintained a **short-video social platform similar to TikTok**, building scalable backend APIs, managing servers, and developing a full-featured admin panel.
- Implemented and supported **livestreaming functionality**, handled server provisioning and installations, and ensured ongoing application stability, performance, and maintenance.
